Purified Antibody Characterization

Clone	Isotype	Reactivity
HI100	Mouse IgG2a	Human

Description

CD45RA is a 205-220 kD single chain type I glycoprotein. It is an exon 4 splice variant of the tyrosine phosphatase CD45. The CD45RA isoform is expressed on resting/naive T cells, medullary thymocytes, B cells and monocytes. CD45RA enhances both T cell receptor and B cell receptor signaling. CD45 non-covalently associates with lymphocyte phosphatase-associated phosphoprotein (LPAP) on T and B lymphocytes. CD45 has been reported to be associated with several other cell surface antigens including CD1, CD2, CD3, and CD4. CD45 has also been reported to bind galectin-1. CD45 isoform expression can change in response to cytokines.

Product Information

Conjugation: Biotin

Formulation: PBS pH 7.2, 0.09% NaN₃,

0.2% BSA

Storage: Keep as concentrated solution. Store at 4°C and protected from prolonged

exposure to light. Do not freeze.

Application: Recommended Application: FC

Usage: Each lot of this antibody is quality control tested by immunofluorescent staining with flow cytometric analysis (The amount of the reagent is suggested to be used $f \le 0.5$ µg per 10^6 cells in 100 µl volume or 100 µl of whole blood. Please check your vial). Since applications vary, the appropriate dilutions must be determined for individual use.
