### Purified Antibody Characterization

Clone	Isotype	Reactivity
OKT-8	Mouse IgG2a	Human

### Description

CD8 is known as T8 and Leu2, is a member of the immunoglobulin superfamily found on the majority of thymocytes, a subset of peripheral blood T cells, and NK cells (which express almost exclusively CD8a homodimers). CD8 acts as a co-receptor with MHC class I-restricted T cell receptors in antigen recognition and T cell activation and has been shown to play a role in thymic differentiation.

### Reported Applications:

This OKT-8 antibody has been reported for use in Flow Cytometric Analysis.
