Purified Antibody Characterization

Clone	Isotype	Reactivity
OKT3	Mouse IgG2a	Human

Description

CD3ε is a 20 kD chain of the CD3/T-cell receptor (TCR) complex which is composed of two CD3ε, one CD3γ, one CD3δ, one CD3ζ (CD247), and a T-cell receptor (α/β or γ/δ) heterodimer. It is found on all mature T lymphocytes, NK-T cells, and some thymocytes. CD3, also known as T3, is a member of the immunoglobulin superfamily that plays a role in antigen recognition, signal transduction, and T cell activation. The OKT3 antibody is able to induce T cell activation.

PerCP anti-human CD3

Product Information

Conjugation: PerCP

Formulation: PBS pH 7.2, 0.09% NaN₃,
0.2% BSA

Storage: Keep as concentrated solution.
Store at 4°C and protected from prolonged
exposure to light. **Do not freeze.**

Application: Recommended Application: FC

Usage: Each lot of this antibody is quality
control tested by immunofluorescent staining
with flow cytometric analysis (The amount
of the reagent is suggested to be used from
20 μL to 5 μL per 100 μL of peripheral blood.
Please check your vial). Since applications
vary, the appropriate dilutions must be
determined for individual use.
